

La Française de l'Énergie secures landmark EUR 40 million green bond for the development of its French and Belgium energy portfolio

Pontpierre, France, September 27th, 2021 - La Française de l'Énergie (Euronext: LFDE - ISIN: FR0013030152), an energy producer with a negative carbon footprint announces the issuance of its first green bond for the development of its energy portfolio in France and Belgium. This financing is provided by Edmond de Rothschild Asset Management (EDRAM), a leading energy and infrastructure investment manager.

A sizeable financing to cover LFDE's funding needs and accelerate growth strategy

This green bond will fund the group's existing energy portfolio, currently made of abandoned mine methane (AMM) and solar projects in Northern France and Wallonia, and can be expanded to other low carbon projects such as hydrogen. These projects are either under construction, in development stage, or in the group's development pipeline as part of its growth strategy.

The financing amounts to EUR 40 million, consisting of a committed first tranche of EUR 25 million and an optional second tranche of EUR 15 million. The financing qualified as a "Green Bond" and the issuance has been assessed as compliant with the ICMA (International Capital market Association) Green Bond Principles via a second-party opinion by Ethifinance, a recognised independent expert¹.

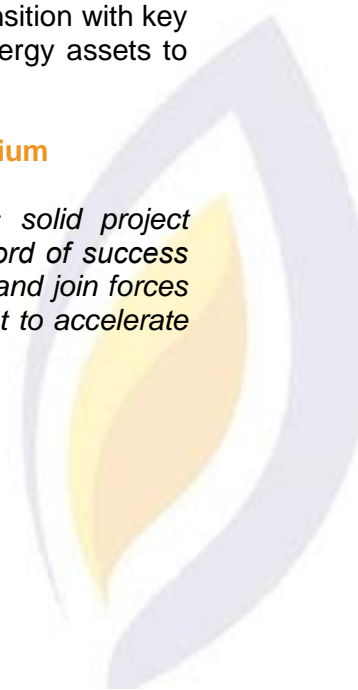

The bond has an attractive 7-year bullet tenor thanks to LFDE's track record in constructing and operating best-in-class assets with long term feed-in-tariffs and fixed price purchase agreements. The financing is provided at the LFDE International SARL level, the Luxembourg subsidiary of LFDE, with no recourse to the parent company La Française de l'Énergie SA. The bond is therefore structurally subordinated to existing senior loans at the individual project level.

This bond enables La Française de l'Énergie to commit sizeable financial resources to accelerate its development strategy without diluting the company's equity in its assets: 49.5 MW of installed AMM capacity will therefore be deployed by December 31st 2022 and 3 million tons of CO₂eq emission avoided annually thanks to the implementation of these projects. This new financing confirms the recognition of LFDE as a major player of the ecologic transition with key long-term financial partners like EDRAM, adding further high-quality green energy assets to EDRAM's infrastructure debt portfolio.

A long-term partnership to reduce the carbon footprint of France and Belgium

"Our company's first green bond issuance is a testimony of the group's solid project development pipeline and high-quality assets. LFDE's ambition and track record of success allow to secure competitive long-term financings, achieve economies of scale and join forces with leading debt investors such as Edmond de Rothschild Asset Management to accelerate

our growth strategy and consolidate LFDE's size and position as a negative carbon footprint energy producer." welcomes Julien Moulin, Chairman of La Française de l'Energie.

"The size and tenor of this landmark deal highlight our group's efficient financing strategy. The achievement in raising our first green bond for a multi-technology portfolio of low-carbon assets across two geographies truly sets La Française de l'Energie apart in its market." specifies Aurelie Tan, Chief Financial Officer of La Française de l'Energie.

Jean-Francis Dusch, CEO of Edmond de Rothschild UK, CIO of Benjamin de Rothschild Infrastructure Debt Generation (BRIDGE) and Global Head of Infrastructure, Real Assets & Structured Finance explains: "This investment is an excellent addition to our infrastructure debt portfolio. Given the drive for decarbonisation in developed markets and the conviction-based investment strategy of EDRAM, recoverable energy is an important investment theme for us, and La Française de l'Energie successful track record of developing green assets make this a highly attractive energy transition financing."

La Française de l'Energie was advised by Aurel BGC as Placement Agent and LPA-CGR as legal counsel. EDRAM was advised by BENTAM as legal counsel.

La Française de l'Energie confirms its objective of achieving annualized revenue of € 35 million and an EBITDA margin of over 45% by the end of 2022.
